

THE EXPLORERS

Must turn two between September-January

The class provides children with a structured environment with age appropriate activities that develop basic skills and encourage a child's sense of wonder and well-being. The teacher's focus on refining motor skills by giving the children the opportunity to work puzzles, glue, string items, and dance along to action songs. They also focus on teaching the children basic concepts, such as colors, shapes, numbers, and alphabet. They have an art project each day that reinforces what they are learning about in class. The children also have a one on one time each day with an art teacher to do an extra activity that corresponds with what the children are learning in their class. This is truly a time of exploration and growing.

Schedule
